1552.

ANALMANACKE AND PRONOSTICA-tion,

made for the yeare of oure Lorde God.

declarynge the houre and mynute of the rysynge & settynge, of the sunne and moone for euery day in the yere, and also the rysynge, the noone stede, and the settynge of the seuen starres, with a certayne rule of two starres, standyng vpon the former shulders of the great Beare, & of some men called Charles waine, wherby ye shal knowe euery houre of the nyghte, very necessary and pleasant for al sea men and maryners, and for those that doeth occupy the nyghte, and these rules shall continue and be parmanent without anye great alteracion, the space of. yeres to come, the whiche is composed by Phisition.

UM

the Almanacke.

The golden numbre, xiiii.
The cycle of the sunne. xxi.
The Sunday letter. E.
Betwixte Christmas and Shroftyde. ix. wekes and. ii. dayes.
Septuagesima the. xiiii. of Februarye
Ashe wenisday the. ii. of Marche.
Easter day, the. xvii. of Aprill.
Ascencion day, the. xxvi. daye of Maye.
Wytsonday, the. v. of June.
a. To take purgacions by electuaryes.
b. To take purgacyons by drynckes.
c. To take purgacyons by pylles.
d. To take clysters.
e. To enter into bathe.
f. To let bloude.
Let blud of al flewmatike persons whē the mone is in Libra or Aries, excepte the heade and thyghes.
Let bloud of al melancoly persons whē the moone is in Libra or Aquarye, excepte the buttockes and legges.
Let bloud of all coleryke persons when the mone is in Cancer, Scorpio, or pisces, except the brest, longes, priuymembres and fete.
Let bloud of all sanguyne persons whē the mone is in Aries, Cancer, or Libra,

except the head, brest, or thyghes.

¶ From the chaunge to the first quarter let bloude in yonge persons.

¶ From the fyrste quarter to the full, let bloud in yong persons, and in those that be men and women.

¶ From the ful to the last quarter let bloud both to men and women, and also of olde persons.

¶ From the last quarter to the change, let bloud alonely in olde persons.

¶ To know when the sunne ryseth.

THe numbers in the Margent doeth serue for the houres and minutes of the rysynge of the sunne, as from the fyrst daye of Januarye to the twelue daye, the Sunne riseth at. viii. of the clocke, and certaine minutes after, and from the. xii. daye of January to the. x. daye of Februarye, the sunne ryseth at. viii. of the clocke and certayne minutes before.

¶ From the. x. of Februarye, to the tenth of Marche, the sunne ryseth at. vii. and certayne mynutes before, and thus recken to the. xii. of June, accordinge to the numbers set in the kalender.

¶ From the. xii. of June, to the. xiii. of July, the sunne ryseth at. iiii. of the clocke, and certayne mynutes before, and from the. xiii. of Julye, to the. xv. of August, the sunne riseth

riſeth at.iiii.and certayne mynutes after and ſo reckē to the ende of December, and the,xii.day of January,

¶ To knowe when the ſunne ſetteth.

MArke fyrſt the riſing in the kalender the whiche is alway eyther at.iiii. of the clocke v.vi.vii.or. viii. and certaine mynutes before or after, as when the ſunne riſeth at. viii.he ſettes at. iiii. and when he riſeth at.v.he ſettes at. vii. and when he riſeth at. vi. he ſettes at.vi. and when he riſeth at.iiii.he ſectes at.viii. after this maner.

¶ From the fyrſte of Januarye to the. xii. the ſunne ſettes at.iiii.and certayne mynutes before, and from the.xii.to the.x.of Febꝛuary the ſonne ſettes at,iiii. & certain mynutes after, and thus reken. viii.to.iiii vii.to.v. vi.to, vi. and when the ſunne riſeth with mynutes after, he ſettes with mynutes before.

¶ Example.

¶ The.v.daye of January the ſunne ryſeth.at.viii. of the clocke, and.x.mynutes after,then he ſettes at.iiii.and.x.mynutes before.

¶ Another example.

¶ The.xiii.day of Marche the ſunne ryſeth at. vi.and.vii. mynutes before, then he ſettes at.vi.and.vii.mynutes after.

¶ To knowe the quarters and halfe houres.

KNowe that .xv. mynutes conteyneth one quarter of an houre, and thyrtye halfe an houre. xlv. thre quarters of an houre, and .lx. a hole houre, also ye muste vnderstande that the houre wyth his quarters muste be taken the one halfe at morowe and the other halfe at nyght, as thus.

¶ The seconde daye of January, the sunne ryseth at. viii. of the cloke, and. xiiii. minutes after, the which lacketh but one minute of a quarter of an houre, yet ye muste saye the sunne ryseth at. viii. and halfe a quarter after, and settes at. iiii. and halfe a quarter before: so that both at the risinge and settyng ye haue the hole quarter, and thus consydre at all tymes.

¶ To knowe the rysynge of the moone, daye and nyghtly.

¶ The numbers that are set nexte within the daye letters in the almanacke declareth the houre of the rysynge of the mone, and from the chaunge to the full, the mone ryseth muche on the day: and from the full to the chaunge contrary.

¶ To

¶ To knowe the settynge of the mone.

☞ Marke the synne that the Mone is in and the same length that the day hath whē the sunne is therin, the same length the hath the mone betwyxe the rysyng and the settynge.

¶ Example.

☞ The second day of January the mone is in the begynnynge of Aries, and ryseth at ii. after mydnight, and when the sonne is in aries, the daye is. xii. houres longe, then recken that the mone setteth at. ii. ar after none. &c.

¶ The rysynge of the seuen Starres.

¶ The houre when the. vii. starres ryseth and the houre when they are in the nonestede, and the houre of theyr settynge shall be declared at euerye monethes ende in the almanacke.

¶ The rysynge of the. ii. Starres of Charles wayne.

I thynke there be many that knoweth the seuen starres. in the North called Charles wayne, or Charles cart, likenynge. iiii. starres to. iiii. wheles. and the other. iii. starres to. iii. oxen, of some ma-

ryners they are called the wardes, and the two fyxte starres I take for my purpose, and declareth at euery monethes ende, at what houre they are full west & the houre that they are west and by north: and north west and northwest & by northe, and north northwest and by northe, and full northe: and so rounde about. xxiiii. houres: And bycause these poyntes are harde to be knowen of the vnlettered man without certain parmanent rules, I shall declare my fantasy. The poore laboyer and plowman shall take for theyr rule the standing of the churches that standeth East and West ouere, and therby to iudge the poyntes as nere as they can: The maryners shall knowe the poyntes and houres by theyr compas, and other men that lyst to practise by other feates maye with a paper deuyded in. xxiiii. partes and a diall set in the myddes therof in a wyndowe or dooze towarde the northe, and so shall the deuysion appoynt the houres, euen accordynge as the. ii. starres of Charles wayne standeth vpon the heauen, also consider the quarters and halfe houres bothe of these and the. vii. starres, as ye do in the quarters and halfe houres of the sunne and mone aforesayde.

To

¶ To knowe the length that the sunne and moone hath betwyxte the rysynge and settyng in euery sygne.

¶ In Aries.xii.houres.
¶ In Tauro.xiiii.houres.
¶ In Gemini.xvi.houres.
¶ In Cancer.xvii.houres.
¶ In Leo.xvi.houres.
¶ In Virgo.xiiii.houres.
¶ In Libra.xii.houres.
¶ In Scorpio.x.houres.
¶ In Sagittary.viii.houres.
¶ In Capricorne nere.ix.houres.
¶ In Aquari.viii.houres.
¶ In Pisces.x.houres.
¶ In Aries.xii.houres.

¶ Also from the begynnynge of the' sygnes to the endynge ye must consyder the quarters and halfe houres, as is afore sayd of the sunne.

¶ Also marke that euerye newe Moone rysseth at morowe wyth the sunne and euery full mone ryseth at night when the sunne setteth.

¶ January hath .xxxi. dayes.

Cum priuilegio ad imprimendum solum.

¶ A Prognosticatyon, made for the yeare of oure Lord God M.CCCCC. L.I I. By Anthony Alkham Phisytyon.

IN perusing the face of heauen at thee.iiii.oppoſicions preuentionall and in eſpecial the houſes of ſyckines and the Lordes thereof, wyth the powers hathe eſſencyall and accidentall, it is to be ſuppoſed ỳ this yeare ſhal come hote Agewes, as Tercianes and quotidians, pleareſes, ſpyttyng of bloud, and many other iſſues therof, with freneſſes and lytle ſlepe, with many paynes in thee head, eyes, necke, and harte, and alſo in the priuie members, and in eſpecial in the age of Adoleſency & in Sanguyn and hoate Colericke cõplections, with many other kyndes of hote feuers and venemous Peſtilẽce, wherof ſhal come haſty and ſoden death. Wherfore lette

euery man pray to God for grace, and also endeuour thē selues to auoyde the primatiue causes therof, and in especiall abstayne from glotony, raw frutes, herbes and fishe, lest the horte coleryke Mars fynd any cause antecedente in the bodye wherin he maye worcke, ingendre, and bring forth these dyseases and infirmities aforesayd.

¶ The disposition of that parte of vvinter, from nevveyeres day to the, X. of Marche.

This tyme shalbe rayny wyth moche moysture, and some snowe, and specially in Februarye, the beginning of Marche shalbe indifferente, the greatest stormе shalbe in Februarye.

¶ Of spring tyme.

¶ From thee. x. of Marche to the

xii

xii. of June is ipzinge time, yet the last of March shalbe wynter wether & wyndy. Apzil fayze and wyndye. Maye colde and rayny.

Of Sommer.

From the. xii. of June to thee xiii. of Septembze is sõmer. Julye raynye in the beginninge and ending, August moch cloudy wether and rayny, and so in Septembze, but not so moch.

Of Autumpe.

From the. xiii. of Septembze to the. xii. of Decembze is Autumpe. Novembze colde, rayne and snow and wyndy. Decembze moze fayze and so to Newyeares daye.

Januarye.
